

“

*The smile on her face said everything words
couldn't.*

MICHAEL TZANIS · FOUNDER

[Her story →](#)

5th grade Innovation and Design. The class was building a 3D model of Venice and discussing the impact of sea level rise.

*She'd just arrived, with **almost no English**. Heavy terminology. Hard to join in.*

Then she picked up a pencil and drew a layout of Venice that looked like proper engineering work.

*She didn't need the words yet. **She needed a way in.***

Hands-on STEM gives every student a low entry and a high ceiling.

The language follows.
