PISA 2029 · MEDIA AND AI LITERACY

PISA will test your students on AI literacy. overSTEMed helps your teachers get them ready.

The students who sit it are 12 and 13 today.

WHAT PISA WILL LOOK FOR

Not which buttons to press. Whether they understand.

- How AI and media platforms work
- The human role behind them
- Their social and ethical consequences
- Working and communicating with AI well
- Judging what is credible, and why it was made

Tested inside simulations of the internet, social media and AI tools.

HOW OVERSTEMED HELPS · 1

How AI works, without a screen.

WITH TEACHERS

Sort examples by hand, write rules until edge cases break them, poison a dataset on purpose and watch bias appear. No screens.

THEN, IN CLASS

Students learn how a model learns, and who chose its data, before they ever open one.

HOW OVERSTEMED HELPS · 2

Fluent, confident, and wrong.

WITH TEACHERS

Meet an answer that sounds right and is not. Practice the judgment PISA is looking for.

THEN, IN CLASS

Students learn to accept an AI answer, revise it, or reject it, and say why.

HOW OVERSTEMED HELPS · 3

Into a lesson they teach next week.

WITH TEACHERS

Each teacher redesigns a lesson in their own subject. Colleagues try to game it, then they fix it.

THEN, IN CLASS

Students practice this thinking in history, science and languages, not in one extra class.

OVERSTEMED

overSTEMed helps the teachers. The teachers help the students.

Not test preparation: the thinking the test looks for, built into lessons teachers already teach.
